# Glimpses of Hope in the Shadow of War

Afghan Youth's Outlook on the Future:  
Selected Essays and Drawings

**Ed. by**

Aisha-Nusrat Ahmad

Ulrike Auge

Khesraw Majidi

Phil C. Langer

March 2019

The Afghan Youth Project was funded by the German Foundation for Peace Research from 2016–2017. A grant by the Stiftung Analytische Psychiatrie enabled further in-depth analyses of the data and the publication of this compilation. We would also like to thank Milad Majidi for his support in translating the essays and Katrin Kassel for designing this brochure.

The following compilation represents a selection of more than 170 essays and drawings that were collected in the Afghan Youth Project in different schools and orphanages in the Balkh province in 2016 and 2017. J. M. Gillespie and G. W. Allport's (1955) study »Youth's outlook on the future« provided the starting point for using projective essays as a biographical method in social psychology. The essays answered to the question: How do you imagine your life within the next 10 years. After finishing the essay, the children were asked to draw a painting that corresponds to the essay. For methodological considerations see: Langer, P. C., & Ahmad, A. N. (2018). Psychologie und Biographieforschung. In H. Lutz et al. (eds.), *Handbuch Biographieforschung* (pp. 175–186). Wiesbaden: Springer VS.

»By the name of almighty Allah,  
the most compassionate and the most merciful.

### My wishes and hopes

Humans always want to have a comfortable life and everywhere each human being has different wishes and hopes. My first wish is to have peace all over my poor country. The one and only wish of all Afghans is peace. Everyone wishes to live happily. My wish is to have peace in the country, so I could finish my studies and get the admission into the university and after finishing my higher education serve honestly from the bottom of my heart my country. Our country needs us to protect it from this situation. Until I breathe, I will serve this country. I wish very much to become a successful doctor and serve my dear country and I pray that Allah may fulfill my wishes. I wrote my wish in this essay. I hope the way I wrote my wishes with confidence and a relaxed mind in this essay, I could reach my wishes with the same easiness. My wishes will come true when my country is in peace. I wish very much that my country's people be happy and have a comfortable life. We are tired of all these fights and our ears are tired of listening to the world fighting and the sounds of explosions and we cannot suffer anymore. We have never seen or heard that the areas or province have been taken back by the government from cruel insurgents or the Taliban. We always hear that the provinces or the areas are captured by the Taliban. It is enough now, and our people cannot suffer the pain anymore. Whenever mothers lose their children and sisters lose their father and mother there are always tears in the eyes of the mothers, fathers, sisters, and brothers. We want peace and we Afghans are thirsty for peace. We wish that these wishes are fulfilled and thanks a lot you all dears.«

Sun: I want my country to be green and shiny like this.

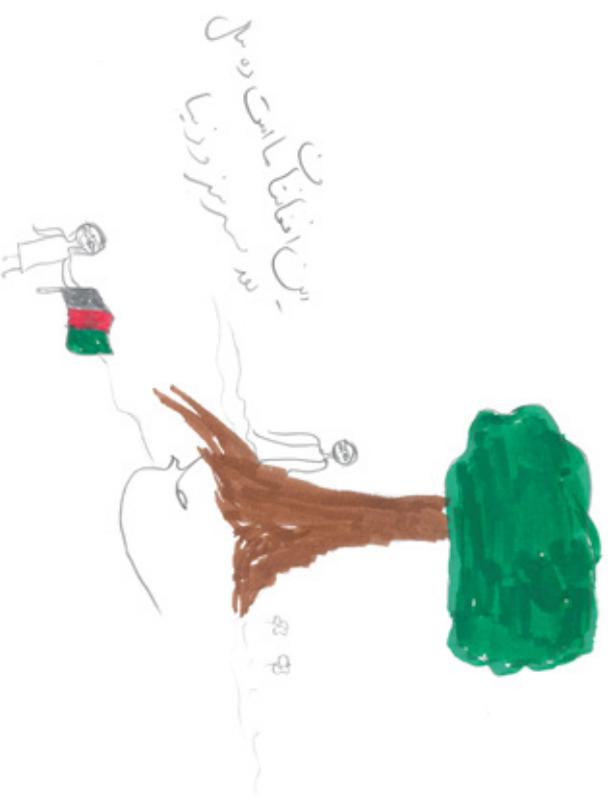

## Shaista

16 years old, living in a rural area in the Balkh province

» I always think positively. I wish that peace would come all over my beautiful country. We are the future makers of the country. We should always struggle and try hard to be successful. Today there are conspiracies of the Taliban and IS in the country, so they could stop us from improvements by their unjust acts and confuse our minds. I see our people's future bright. Human beings are able to achieve everything by making an effort. Today all study materials are provided for us. Technology has been improved, then why should we not use our brain. We should stand on our feet and use our brain and imagination. We should keep in mind that we will have a great future. Today our youth go to foreign countries because they think they will have a comfortable life there, but it is not true, in fact, they ruin their birthplace, so let us give hands to hands to have a beautiful Afghanistan. We should use our power by ourselves and suppress the insurgents. One of the ways of success is to have faith in your power and yourself. We should not think about what we are, we should see what we should do and what we want to be and dedicate ourselves as a good person to society. Hazrat Omar (peace be on him) said we should try our best in doing things we want to do and take the advice of the others as well. Afghanistan is our mother.

We should be like a tree that others could sit under our shadow and use our fruits. Afghanistan. I love you. I wish you always to be developed and built up. I will always try to build you up and will encourage others too. I want to become a very good and intelligent doctor, so I could serve my country and my compatriots and perform my religious and Islamic responsibilities.«

Poem: »We can give colors to our country by education as flowers make colorful the garden. Only the people in the country can decorate the country, as only the gardener can make the garden beautiful.«

This is our Afghanistan. In the next ten years, it will be green and beautiful.

These are our crying women who are begging today.

## Farhad

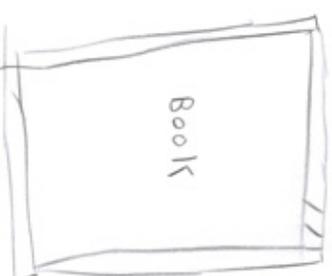

15 years old, living an urban area in the Balkh province

»If I think for myself then I want to have peace for the next ten centuries. If we live a peaceful life for the next ten years we would have a life everyone would want to have. I hope that one-day peace will be established in all Afghanistan. Peace is the sweetest word. If we live ten years in peace we would have such a great improvement. Racism, religion, hostility will be abolished and people who graduate from different departments can have jobs in the field of their studies. And the country also likes to have peace.

A country like Afghanistan that has had wars and insecurity for several decades would most likely want to have peace. It does not matter male or female everyone loves peace. If we live for ten years in a peaceful life it would be a great life and we would enjoy every second of it. Afghan people want peace and they escape from the name of war. Wherever peace is written people are excused to repeat words about war. If I live for the next ten years a peaceful life I can continue my studies in my favorite subjects which is engineering, technology, and chemistry. If we talk about wasita I would rather not study. And now I want to say some words about my insecure nation, Afghanistan: when there is a suicide bomb attack, everyone will think for one month or one week about the people that died or got injured. This is why we all love to have peace and security.  
Live in Peace. «

دردجویند کو رانیسا مسما

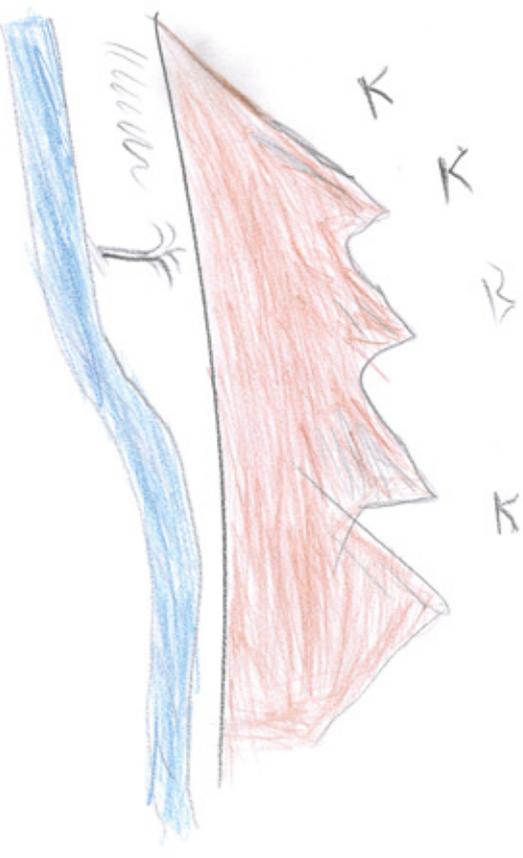

Two things that can even give sight to those who are blind:  
Pen and book.

**Maria**

**14 years old, living in an urban area in the Balkh province**

»In the name of Allah,  
the most gracious and the most merciful.

For the next ten years, I want to be a doctor and serve the community. My imagination is basically to study in the medical field so that I could serve my worried people. It starts with the primary school. I should study, and I should not waste my time. Now I am in the 8<sup>th</sup> class. I want to plan my future in a way that I should not regret. Actually, if I could help myself then I can help my dear country as well. Those people who have lived their lives in the last 25 years in the war can improve as well. I accept that my country will use my ideas in the future. I am a girl, but my courage is like the one of a man. I am 14 years old. I have some suggestions for my government in the economic field in order to connect the infrastructure with foreign countries and to have peace with our own people in the society and keeping solidarity with these people. Our biggest problem is that we do not value time and defraud it. First of all, I want to use my time very carefully and get more knowledge and to study more so that I could serve my society. I hope you guys use my ideas in a good way in the future.«

## Nasrullah

15 years old, living in a rural area in the Balkh province

» We want a peaceful Afghanistan with no fight. We want everyone who brings the fight and destroys Afghanistan to be destroyed. I want to become an army soldier so that I could protect Afghanistan from the ongoing fights. I want schools to be well-equipped and universities to have a high standard teaching system and an Afghanistan to be free from the fight. We want our teachers to be fine. I want to finish school, so I could help Afghanistan. We want our neighbors to help our schools. I want to pass the conquer exam and continue my studies in my favorite field. I want to study abroad. We want peace, so we could finish our school in a peaceful environment. We want courses to be established in our province. I want to continue my higher education in a secure and peaceful environment and my last wish is to start my higher education abroad. I want to continue my higher education out of the country. I want foreign scholarships to be provided for us.«

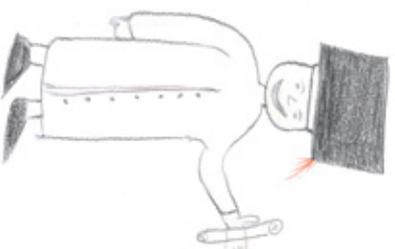

Peace.

## Hadisa

15 years old, living in an urban area in the Balkh province

» I want to continue my studies in the next four years in a peaceful environment and in a good school like the private school, I am attending. In school, I want to have good marks and gain lots of education and pass the university entry exam and want to get a good position. I wish that the entry exam goes well and the bright students who deserve it would pass the exam and I want to be one of them. In the future, I want to be a lawyer, that will take 4 semesters of study. During that time, I would like to work as a teacher and after finishing that I want to be an advocate and I want to serve my people. And I want to defend the ones whose rights were violated. I want to promote and develop peace in Afghanistan. I want to do things that serve me in this life and hereafter. And I wish when I become a lawyer there would be peace in Afghanistan so that I could do my job without being at risk and I could tassel the ones who give and take bribes. I support the people that are honest and innocent. I want to defend women's rights when I am a lawyer. I want to serve Afghanistan so that God and my parents would be satisfied with me. And I want to prevent those who migrate to other countries and I want to provide jobs in our own country because the foreign countries distance Afghan people from their families and their religion. I want to stay a faithful girl and be with God.

The education of the young generation is important to me because they are the future of the country. I want to provide a good place for children in order to have a better education. I want to build a school with good teachers and a good teaching system. And I want all Afghans to live a peaceful life. That is the mission of all Afghans. I want to go to my office with my car. I want to teach all the women how to drive. It would be great and I need a good and peaceful life for myself.«

## Shumaila

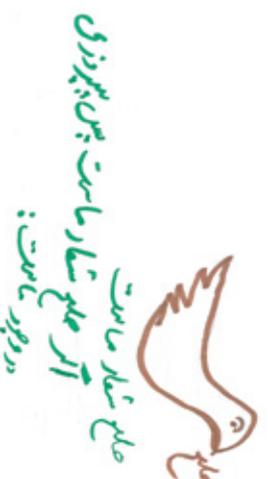

13 years old, living in an urban area in the Balkh province

»Of course, everyone has imaginations in their mind when they think about how to realize them. My imagination, first of all, is that I should pass the upcoming university entry exam and should think how I could get into my ideal field of study and if I could get selected for a job after the graduation or not. Of course, everyone studies with the wish to help their family and people. The question is whether we can have these opportunities or not. None of the youths can reach their aims with such a government full of corruption, racism, discrimination etc.. We have a conflicted country and we need a strong and powerful government which would be clean from corruption etc.. We need and want that our country like other neighboring countries to be developed. A country has several properties. Our country is a rich a country and if we use its treasure, of course, our country will improve and develop, and I want everyone whether in a high or low position to give hand to hand and to rescue the country from this miserable situation. A high level of security and education could help our people to build our country. For improvements, we need education and security. The development of a country is linked to education. Everyone wants, they are provided the best opportunity to study. We want from the government to improve the level of education in the country until we do not need to go abroad to study. We want to erase the word war from our country forever and want to have peace instead because everyone needs peace. Our religion is Islam and Islam means peace and unity, not war. First of all, I want the American forces to go out of Afghanistan because they are the root of the war in Afghanistan. The Americans came for their special aims in our country not for ending the war. They have their hands in the pie when it comes to war, attacks and terrorist groups. I want improved technologies in the country because the improvement of a country is connected to technology. The export level should increase, and the production level should increase too. Finally, I cannot write all my imaginations here, because I have lot a lot of imaginations and it is not the end. Even if I wanted to write about them all I would need a lot of notebooks to write all my imaginations. I hope my imaginations are read carefully.«

War is our misfortune.

Peace is our motto. If peace is our motto, we will have victory.

## Khatera

17 years old living in a rural area in the Balkh province

»In the name of almighty Allah, the most compassionate and the most merciful.

Wishes for a better tomorrow

Firstly, we want peace, so we could continue our education and higher education. I want to live in a friendly and peaceful environment and I want to become a successful doctor in the future, so I could serve my prideful and honorable people. If peace comes permanently to Afghanistan, inshallah we can reach to a high level of success. Now when there are insecurity and instability in our country, we cannot study with a peaceful mind. My wish is to graduate with high grades from school and to successfully get to my interested field of study, which is medicine. Insecurity remains in our country. Afghans please be happy. We request the international organizations to help the Afghan people, so we could get rid of the miserable situation we are suffering from. Peace is the wish of every Afghan.

I hope that I become a servant for my family, country, and society in a friendly and peaceful environment. My wish for the next ten years is that girls and women who are victims of violence in the provinces and remote areas get help and these violent acts should be prevented. For some people it is against their pride and honor when girls go to school. I hope that it should not be like this in the future and every girl or boy could continue their higher education. We are tired of three decades of war and hope that there would be a better tomorrow for every Afghan.«

پهلوونو  
شالو

We want peace.

## Faisal

16 years old, living in an urban area in the Balkh province

»In the name of Allah,  
the most gracious and the most merciful.

These days Afghanistan is in a serious situation. The youth worries about how to liberate themselves out of this situation. Me, like many other youngsters, have these thoughts. I love my Islamic society and I want it to remain like this. That is the reason why first we should find ourselves and then we should think about the society. Those people who do not think about work and life are those who are not successful in life. Regarding the next ten years, I have lots of thoughts. But those are also shared by others: security and our responsibility towards the country. The security will ensure that people will find tranquility in the society and will live far from fear and shocks. A society can only be very good and without problems, when peace is ensured. Peace has a remarkable outcome for the society. Every human loves to live in a society, where peace is ensured. Like me.

Peace: Living together, hand-in-hand, far from war and conflicts. For the next ten years, that are associated with my own future, I have a lot of ideas that I am striving for: First of all, the most important thing for me is bringing security and overall peace. Then I would like to live in a wonderful society with a lot of good and intellectual people. I am one of those diligent youngsters that have a lot of ideas for the society. In the next ten years, we could transform our society into a society that could be comfortable and pleasing for everyone. I am grateful and proud that you found us worthy to write about this topic.«

Peace and freedom.

## Khadija

17 years old, living in an urban area in the Balkh province

»First of all, I want to graduate from school. Then I want to study in a good university Inshallah and I want to be a servant for my people. I love the law. I want to use new opinions. And the only ambition that I have in my mind is to have peace and security in our country. And I want all the children to go to school and study and we eliminate poverty. Now, Afghanistan is in a bad situation and we want to end it as soon as possible. I am proud that I am from Afghanistan. You guys can use my ideas. Most of our compatriots go abroad. Many of them go illegally there, some of them arrive there safely and some of them drown in the rivers in Turkey and Greece. It really hurts us when we hear this news. If we have peace in our country, no one would like to go away from their family and home, they leave because they are concerned about their security and they do not want to spend their lives in danger. They are forced to travel to foreign countries. One of my biggest hopes is to go to a foreign country too. I don't know when it will become reality. I want to be a good lawyer in the future, and I want to do justice truthfully not like right now when they take bribes and appoint judges and the justice is unjust as we have seen in Farhanda's case. We need peace. We need justice!«

افغانستان د ترهګري ګان ډګر څارنه.

Afghanistan is in this situation.

We want this Afghanistan.

## Malika

17 years old, living in an urban area in the Balkh province

»Everyone has hopes in their lives to achieve their main objectives. I also have hopes for my future and in the near future, I want to become a successful doctor because my favorite field is medical. I want to be a person that my mother and father are proud of and I want to be the one who helps others. I have two wishes in my life: First, I want to serve my father and my mother and respect them endlessly; Second, when I will be a successful doctor, I want to have great ideas and use the experiences of others and get experience in my life. It is not important whether humans achieve their hopes, but it is important that people should make an effort. If we make an effort for our hopes, then we will be successful. If humans try, they can reach the peak of fame. Like professors, presidents and educated people could reach by trying and making an effort. I also try to do that in the near future I will be a successful doctor and I have always liked to have a country that would be green, and that people could live their lives in peace and easiness. A relaxed life is the right of every human. I want to be a successful person and because of this my family, my society and my country are proud of me. At the end, I want to say one word: Making an effort is the correct way to achieve our aims and Allah is the best instrument.«

Graduation from a medical university.

Peace, greenness, and achieving the wishes and graduating from the medical university.

## Sarah

17 years old living in a rural area in the Balkh province

»By the name of Almighty Allah,  
the most merciful and the most compassionate.

Salam o Alaikum

Salam to those respected people who have planned  
this program and thanks to them.

Youth's life

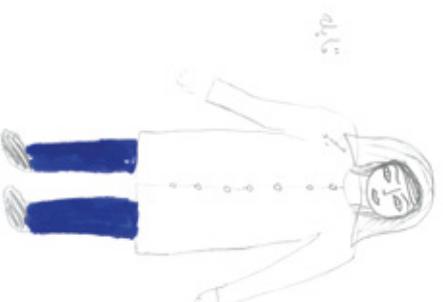

Life and habits change by time. Living with families in Afghanistan is a valuable part of the social life. Youths especially females have problems and they cannot take decisions independently. They face many problems in their life, for example, harassment by bad boys; they harass girls while they go to the university, also other problems like financial problems, illiterate families that do not know the value of education, lack of educational materials for students such as books etc.. I start by telling about myself first, this year our school did not provide me books for studying. Lack of materials for practical work in a laboratory is one of the problems too, as it is very important for the experience. The new generation wants to have professional teachers as well as complete educational materials. They want peace all over Afghanistan and they want to have jobs. The new generation wants to have education and we do not want our enemies by the names of Taliban and IS to destroy our unity. My name is Sarah and I want to study in the nursing field and help and solve the problems of our sisters and mothers who have suffered a lot and serve them. Everyone should try to bring changes, starting from themselves. Everyone should serve honestly and truly. I will be a graduate student next year, and I want to finish university and want to serve females honestly. This all is possible by having peace in the country.«

Poem: »Come, the peace bird and bring the peace message because everyone is waiting for you to bring the message of peace to them.  
Everyone is waiting for days and nights for peace to come and life is successful with peace.  
Everyone talks about peace and everyone hopes for peace.«

We need peace and education for achieving our wishes, as trees need water and energy.

آینده سن

My future as a nurse.

## Rohullah

16 years old, living in an urban area in the Balkh province

»In the name of Allah,  
the most gracious and the most merciful.

According to your mentioned question, I should say that my biggest imagination as an Afghan youth is to have peace, security, and equality all over the country so that we live in a peaceful and secure environment and can freely think and have freedom of thinking. Youths should take a pen in their hands, not weapons. I myself especially want that all the Afghan Youths should have a high personality and be an example not only in Afghanistan but to the world. I want to have a personality that my country would be proud of. I want to be a person that protects Afghanistan from the conflict and fight against all those people who bring fights into the country and still are proud of themselves. They change the country to a war and killing zone of human groups. I want everyone to live in a peaceful and secure environment. Having peace means having life, having a family and having everything. I want poverty to be eliminated in this country. I want to get rid of discrimination in this country. By writing this essay I cannot explain all the pains and voices of the Afghan youth. All Afghan youths are afraid of these things. Always the Afghan youngsters continue their education despite their mental suffering. These Afghan youths tell themselves that they are Afghan and they have the intention to get rid of poverty and illiteracy in the country. Hopefully, the streets and alleys of my country have the fragrance of peace, equality, and humanity. Even if I am to be beheaded, I would say that I want such kind of a day in my country that everyone has a special status in this country, and they would be proud of being and living in this country. By looking at this country, they should be proud of being Afghans. The country should be without external, ideological and technological fights which are a good example of an ongoing fight in Afghanistan. All the leaders who have done wrong during their leadership, one day the people will respond to them. At the end, we have a lot of wishes and imaginations and we cannot write or explain the hopes of the Afghan youth only on one page it will take books to express it.«

## Sahar

20 years old, living in an urban area in the Balkh province

»The society you live in has always an influence on your life. That's why first of all I will explain and write my imagination about my dear country. I want peace and security all over my country in the future. I wish that we have a powerful government that could serve the people and have a rule of law and fulfills their promises in an honest way. I want a real national unity and acceptance of each other. I want political, economic and cultural freedom in my country. I want that my country should stand on its feet without being dependent on other countries and should move towards development and comfort. When my country is in peace and built up, all my imaginations could come true. I want all girls who have graduated from schools to continue their higher education. I want higher educational institutes and universities especially to be built for women that all the girls that are not allowed to continue their higher education in co-educational institute could get the permission. I want to continue my higher education in the future and become a gynecologist and work in a faraway district of my country because there are no female doctors, therefore, the females lose their lives and I could help them to save their lives. Despite being a doctor, I want to be a very kind teacher and want to teach to the newcomer students with kindness and honesty. I should change their concept of fights, hates and ethnic discrimination. I should show them the way of humanity and human acceptance. I want girl's schools in all parts of the country and education should be provided to them. I wish for development, construction, and improvement at the same level in all parts of Afghanistan especially in the parts which were more affected by the war and fights. Education should be provided especially to girls and in the south and east part of the country because of the family beliefs they are not allowed to continue their education. That is why I want schools and universities to be built for them and the families should not have any objections to that. The future depends on God. But we can try and work hard because God says you have to move, and I will pave the way.«

صلح و اتحاد

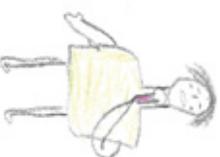

Peace and unity.

**Soraya**

16 years old, living in an urban area in the Balkh province

» I want to be an excellent reporter. This is my biggest wish since my childhood and will remain to be. But I am concerned whether I can I achieve my wishes in the current situation or not because Afghanistan is in a condition that we cannot breathe even peacefully but still I will struggle to change my wish into reality because this is the one and only important wish of mine. I am a girl that was born in a poor family and faced a lot of problems and difficulties, not only me but probably other girls too. The children are also facing these problems and I never thought that I am a poor girl and I should quit school. I resisted against my family and financial problems and that's why I am here now. The only way of success is to try your best. I want security in Afghanistan so I and the others could achieve their wishes. All our wishes will come true and we can achieve our wishes if we have peace, friendship, closeness, unity, and togetherness because one of Afghanistan's important wishes is having peace and freedom. I want Afghanistan to be a country that youngsters could live in a good way with happiness and a country that should not have poverty because I am a poor girl, I have to rely on the support of others during the 12 years of school. I myself have played the main role in my life to be here. If I had not worked hard I would not have been here now. My sister started school together with me but because of financial problems she had to quit school from the 9<sup>th</sup> class. I did not think to quit school in any case, because I want to be an example for others. And I want to have an excellent personality in the next ten years that I could solve my family's problems and solve my country's problems too because Afghanistan and Afghans have suffered more pain compared to other countries. In the next ten years, I want to have an Afghanistan with peace and security. Another important point that I should not forget to write is that in the next ten years there should not be any violent cases against women in the Afghan courts because one of the painful acts is violence against women in Afghanistan and I want all the people who can help us to resist against violence against women to help us in order to eliminate these violent acts by starting from our family and the other people, please, please, please.»

دختر ژورنالیست

دختر ژورنالیست

I want to become an excellent reporter in the future.  
We do not want violence against women anymore.  
We do not want the girls to be abandoned from schools.

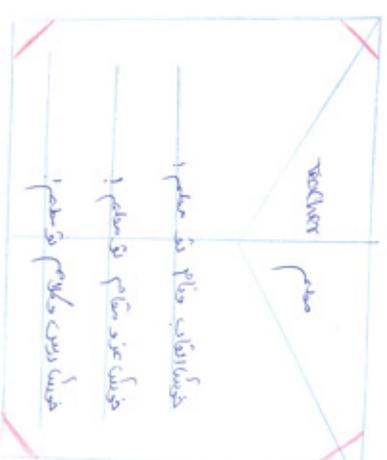

## Muneez

14 years old, living in an urban area in the Balkh province

» I am a student of class 9 and I am the eighth son of the family. I have many imaginations from today until the next ten years. My first wish is that I could protect my country and my compatriots from the current ongoing crises in the country and my second wish is to be an effective and helpful person for my society that I could serve my people and society and my services are such as:

1. I want to be a scholar and have a lot of knowledge and could serve and develop my country and my desperate people through it.
2. I want to provide educational centers for the people who are illiterate so that they could benefit from having education as well.
3. I want to take the drug addicts to health facilities with experienced and capable doctors to treat them because drug addiction is one of the crucial problems in our country.
4. I want to develop agriculture in the country and provide facilities for our farmers so that our country could have well development in the agricultural field and at the end, I want to promote our real and traditional cultures among people of our country because in the last couple of years our cultures have been invaded and I want to eliminate this cultural invasion.»

Poem: »Teacher

A teacher has the best name and title

A teacher has the highest dignity and respect

Teacher's teachings and sayings are the best.»

*Bn*

Education and knowledge.

**Mustafa**

Living in an urban area in the Balkh province

»My imagination for the next ten years is as my parents tell me that I continue studying. They say, the results of my school's last three years are very important and by having a good school degree, I could successfully get into Turkey's scholarship program for continuing my higher education in Turkey and graduate there. They say, there are no jobs in Afghanistan for you unless you do not have a valuable higher degree. When you have it then you could get a job. After coming from Turkey, I want to become a good doctor or an engineer. I am also a tailor's apprentice in a tailor shop. My parents told me that besides having education and knowledge having a profession is also necessary. In this country even if we study, there are no jobs. Our neighbor who has graduated from the university even two years after his graduation he has been jobless and searching for a job because there are no jobs in Afghanistan. Finally, when he could not find a job, he bought a rickshaw and now he is using it for earning the daily expenses. There should be a profession besides education so one could earn money and feed their family.«

## Hamid

14 years old, living in a rural area in the Balkh province

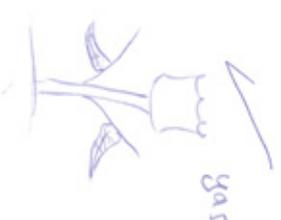

»In the name of almighty Allah, the most compassionate and the most merciful.

First of all, peace is very important for the long lasting of a country. We can study in a peaceful environment, go to school and do other things like that. Approximately 14 to 15 years ago, when there was no peace in Afghanistan, girls could not go to schools. If there is peace, more good people could be presented to society. I want to become a doctor in the future, so I could serve my country and the people of my country. We are thankful to our soldiers for serving us day and night. If there is peace we can go to schools as well as do other things. If in the next 10 years there is no peace, girls cannot go to schools. I want to become a doctor in the future, so I could serve my country. Thanks to this organization. The soldiers in the country are 24 hours ready for the people in the country. Thanks to the soldiers in my country.

Thank you so much.«

A green tree is a sign of peace.  
We can play football.  
Dried out tree is the sign of war:

Aisha

15 years old, living in an urban area in the Balkh province

»In the name of Allah,  
the Most Gracious and the Most Merciful.

With the current situation we have in Afghanistan, I am 90% sure that I am close to my ambitions. With the help of my God and family, I want to study mathematics and learn all the knowledge that is related to mathematics until I am graduated from school. Now I am in the 10<sup>th</sup> class. And I am sure that I will be successful. I will work hard for the next three years and after graduating from school, I want to go to the university, and I want to be an engineer. When I am in the first semester my age will be 19 and for the next four years I will work hard, and I will graduate from the university and by that time my age will be 22. After graduating from the university, I am sure that I can find a job in a company because I am intelligent. I want to manage a construction company. God created humans as capable and nothing is impossible. Whatever comes to our mind, with hard work we can achieve it for sure. I am strong, and I am sure that my plans will work out in the future inshallah. All my ambitions for the next ten years are related to peace and security in my country. If there is peace, I can achieve my ambitions.«

سید ایشا

آرزوی من  
سید ایشا

My ambitions are to build Afghanistan and  
to see the architects that I will create.
