

## Funding Area 1: Research Projects

PROFILE PROJECT | PILOT PROJECT

### Profile project – Guidelines for Applications

These guidelines are intended as a guide for preparing an application for funding a profile project. They provide information on the different ways of interpreting the funding format, and explain the basic requirements to be met when submitting an application. These guidelines are based on the DSF funding objectives and criteria, which are set out in the Funding Concept *“Research Innovation, Network Formation and Knowledge Transfer. Bringing new impetus to peace and conflict research”*<sup>1</sup> and are the determining factors for the evaluation and decision-making process.

#### PROFILE PROJECT

|                       |                      |
|-----------------------|----------------------|
| Funding amount:       | €190,000             |
| Standard duration     | 30 months            |
| Application deadlines | 2 May and 1 November |

The aim of the funding is to initiate research projects addressing original disciplinary or interdisciplinary topics in the field of peace and conflict research. The call is thematically open, and is aimed at researchers from different stages of their career, and from different disciplines and specialisations. A variety of approaches to the research concept can be taken: the development of new research topics and perspectives, the testing and further development of research methodologies, the synthesis of knowledge from a thematic field or the targeted orientation towards application-related issues. Profile projects offer design flexibility, and can be supplemented by networking and knowledge transfer components by making an additional application<sup>2</sup>.

---

<sup>1</sup> The DSF Funding Concept is available at <https://bundesstiftung-friedensforschung.de/foerderkonzept/>.

<sup>2</sup> In this regard, please refer to the other relevant guidelines and *Appendix 3*.

## **Application requirements**

Applications for funding can only be submitted by researchers who belong to or are directly affiliated with a higher education institution, a non-university research institution or a scientific institution recognised as a non-profit organisation<sup>3</sup>. It is not possible to provide direct financial funding to private individuals.

The minimum requirement for submitting an application is having completed a doctorate. Exceptions can only be made for researchers who can demonstrate that they have been engaged in scientific activities for many years and have published relevant articles in the field of research.

The Foundation only accepts applications for project funding submitted by scientific institutions within Germany. It generally only approves funding to domestic institutions. However, this does not exclude the possibility of using funding for international scientific cooperation.

Institutions that receive DSF funding are required to ensure that the funding is administered professionally.

The Foundation supports research activities for a limited funding period. The results of a funded project can also be used to prepare theses and dissertations. The Foundation does not accept project funding applications that focus solely on a doctoral or habilitation project. The Foundation does not award scholarships for thesis and dissertation projects in the context of project funding.

## **Basic requirements**

DSF only funds scientific projects that are thematically related to the research field of peace and conflict research. Relevance shall be adequately substantiated in the application for project funding.

To be considered as a promising application, a structured and comprehensible research concept must be submitted to the Foundation, providing a clear and adequate basis for the reviewers to expertly assess the project. Care should be taken to ensure that appropriate consideration is given to the explanation of the research question, the theoretical and methodological foundation and the operationalisation of the research design.

Applications for funding profile projects must always include a research ethics assessment of the project.

In the case of funding, the Foundation assumes that the organisation receiving funding will provide the infrastructure and basic equipment required to implement the proposed project. Programme allowances and overhead costs may not be claimed. The organisation receiving funding assumes the role of employer for the duration of the project; it is therefore responsible for the proper management of labour costs.

---

<sup>3</sup> Where applicable, relevant supporting documents shall be enclosed with the application.

## Funding criteria

When assessing applications for project funding, the Foundation distinguishes between four core criteria and four additional criteria<sup>4</sup>:

Adequate consideration must be given to the *core criteria* – scientific relevance, quality of the research design, specialist qualifications of the project team, and potential for knowledge transfer – in all project proposals. Their fulfilment is a prerequisite for a positive funding decision.

Not all of the four *additional criteria* – promotion of early career researchers, national and international research collaboration, interdisciplinary orientation, and diversity – have to be met, depending on the research design. However, the applicant should assess how significant the additional criteria may be to the project when preparing the research project. The Foundation expects applications to contain statements on the relevance or non-relevance of each criteria. The fulfilment of additional criteria has an impact on the overall assessment of applications for funding.

## Costs eligible for funding

Funding for project-related labour and material costs can be requested from DSF. Such funding must be used within the specified funding period.

The standard duration of funding is calculated based on the financing of a 75% staff position, TVöD/TVL 13, over a period of 30 months. The staff position can be flexibly adjusted to the duration of the project. Part-time positions exceeding or below 75 per cent may shorten or lengthen the funding period. Positions with less than 50 per cent of a full-time equivalent will only be approved in duly substantiated exceptional cases.

Labour costs include expenses for research assistants and student assistants, contracts for work and services with third parties, and other work (e.g. translations).

Applications should justify the appropriateness of awarding contracts for work and services to third parties. The remuneration paid for contracts for work and services is subject to proportionality in relation to the task profile and the place of work.

Material costs include expenses for travel as well as for working materials and technical equipment that are not part of the basic equipment provided by the organisations receiving funding. It is also possible to apply for funding for a scientific workshop (maximum of €5,000) that is justifiably related to the research work.

Travel expenses include expenses for field research stays and other research trips. In addition, funding for participation in symposia<sup>5</sup> relevant to the project can be requested in order to develop the careers of early career researchers.

The current rates set out in the Federal Travel Expenses Act (BRKG) apply when calculating travel expenses. In the case of longer research stays, different accommodation options should be explored.

---

<sup>4</sup> See the conceptual definitions in the Funding Concept.

<sup>5</sup> Major international conferences such as ISA, EPCR, etc. are excluded from funding.

DSF also finances working materials required for the successful implementation of the research project. These include, for example, the acquisition of specialist literature that is not available in libraries or online, fees for software licences and databases, and the costs of consumables and communication, provided they exceed a reasonable own contribution.

In justified cases, the Foundation also subsidises the purchase of computer equipment and other technical devices. It makes a one-off contribution to no more than 50 per cent of the purchase costs, provided that these are proportionate. This equipment becomes the property of the organisation receiving funding. Running costs (maintenance, repairs, etc.) are not covered.

€1,500 in funding can be included in the project budget for the production of project publications and materials<sup>6</sup> for knowledge transfer. This amount is available exclusively for editorial work, and not for printing allowances paid to publishers.

The budget items must be adequately justified in the application's accompanying text. Funding requirements shall be calculated according to the principle of proportionality. The Foundation reserves the right to adjust cost estimates.

The overviews in *Appendices 1a/b* provide information on possible uses and the underlying cost estimates.

## Application documents

To process applications for project funding, the Foundation requires the following texts and documents (in German or English). These should be either entered directly into the system or uploaded as attachments via the DSF's digital funding portal. Please note that the system does NOT have a footnote function. Therefore, the Harvard citation style must be used. The bibliography can be added at the end in the text field.:

- COVER LETTER | A letter from the applicants to the
- SUMMARY/ABSTRACT | A separate one-page summary of the project
- LONG VERSION | A presentation of the research project (research question, theoretical and methodological foundation, operationalisation, remarks regarding the cost plan, list of references<sup>7</sup>) with approx. of 20 pages (approx. 40,000 characters including spaces)
- COST PLAN | An additional cost breakdown

Supplementary attachments to be uploaded to the system as PDF files:

- If available, graphics, tables, or similar elements to supplement the project's content
- CVs of the applicants and project team members (max. 2 pages each)<sup>8</sup>
- List of project-relevant publications by the applicant (max. 2 pages)<sup>9</sup>
- Cost estimates for third-party services, cooperation agreements, etc.

A suggested outline is included as Appendix 2 to the guidelines.

---

<sup>6</sup> In print or digital versions.

<sup>7</sup> The reference list of research literature can also optionally be added as an appendix (maximum of 2 pages).

<sup>8</sup> The two-page CV should contain only information directly relevant to the application regarding your professional qualifications. A list of presentations, memberships, etc., is not required.

<sup>9</sup> A complete list of the applicant's own publications must not be included with the application

The application must be submitted to the Foundation exclusively via the DSF funding portal.

### **The evaluation and decision-making process**

Applications for funding profile projects are assessed on the basis of at least two external expert opinions. If assessments differ widely, the Foundation may seek a third expert opinion.

The decision on the funding of requested research projects is made by the DSF Executive Board. The procedure usually takes six months.

In the event of a positive decision on the award of funding, the Foundation reserves the right to issue a final approval only after a written statement has been submitted on the points of criticism and follow-up questions in the expert opinions.

In individual cases, DSF opens up the possibility of post-qualifying a research project in the ongoing application process with the involvement of expert reviewers. The project will only be funded if this procedure concludes with a positive overall assessment.

A rejected application for project funding may be resubmitted once in a revised version as a new application.

As a matter of principle, the Foundation only makes the expert opinions available in anonymised form.

DSF approves funding to the applicant's research institution. This entails the compulsory recognition of the Foundation's approval regulations by the management of the institution and the project owner. Further details can be found in the approval regulations for funded research projects.

Osnabrück, March 2026

**APPENDIX 1A | Profile project: Information on drawing up a cost plan**

*When drawing up the cost plan, the following points must be observed:*

- DSF does not assume any overhead costs of the organisation receiving funding. It assumes that the infrastructure (e.g. work rooms, office and computer equipment, access to software licences, libraries and databases) is provided by the organisation receiving funding as its own contribution. For this reason, any material costs listed that count as part of a research institution's basic equipment require special justification.
- If labour and material costs have been calculated incorrectly, the Foundation will not allocate additional funding. It is recommended to add a 5% safety margin to the labour costs in order to compensate for progressive collectively agreed wage rises.
- Lump sums with no mention of a specific intended use will not be granted.
- Individual cost items should be rounded up to the nearest €10.
- Please note that a cost plan with the necessary explanations must be included in the long version of the application.

## APPENDIX 1B | Profile project: Information on drawing up a cost plan

| COST ITEM   | INFORMATION   | REMARKS   |
|---|---|---|
| <b>LABOUR COSTS</b>   |   |   |
| Staff positions for project execution   | Total employer costs (Arbeitgeberbrutto)<br>TVÖD/TVL group, normally pay grade 13<br>Duration of employment<br>Full-time equivalent as a percentage<br>Safety margin (5%) | Employees who have not completed a doctorate, up to group 13 at the most  |
| Student or research assistants  | Duration of employment<br>Monthly working hours<br>Hourly rate, including ancillary wage costs  | Wages rate of the organisations receiving funding   |
| Contracts for work and services with third parties                                | Scope, performance, remuneration  | Remuneration taking into account local conditions   |
| Fee contracts   | E.g. translations, transcriptions   |   |
| <b>MATERIAL COSTS</b>   |   |   |
| Project-related field research stays and other research trips                     |   |   |
| Flight and travel expenses  | Ticket and feeder costs<br>Local transport costs  | Provisions of the Federal Travel Expenses Act (BRKG)  |
| Subsistence costs   | Number of overnight stays<br>Number of days and daily rates (see BRKG)  | Review of the type of accommodation in the case of longer research stays  |
| Incidental travel expenses  | Visas, vaccinations   |   |
| Participation in project-related or topic-related scientific conferences          |   |   |
| Travel and participation costs  | Ticket and feeder costs<br>Number of overnight stays<br>Number of days and daily rates (see BRKG)<br>Additional costs such as visas and fees                              | Applies only to early career researchers employed within the project. Association conventions and major international conferences (e.g. ISA, ECPR) are excluded |
| <b>WORKING MATERIALS</b>  |   |   |
| Computers, standard software, mobile devices                                      | Grants up to a maximum of 50 per cent of the purchase costs   | Justification why they are not part of the basic equipment provided by the organisation receiving funding   |
| Specialist literature   | No specific information   | Not available in libraries  |
| Special database fees and application software                                    | Name of the database and application software   | The applicant should check whether licences are available at the organisation receiving funding   |
| Consumables and communication   | Examples of intended use  |   |
| <b>PROJECT-RELATED WORKSHOP (maximum of €5,000)</b>                               |   |   |
| Conference expenses   | Duration and number of participants<br>Flight/travel expenses, subsistence costs<br>Organisational costs  | Provisions of the Federal Travel Expenses Act (BRKG)  |
| <b>PROJECT PUBLICATIONS (subsidy, maximum of €1,500)</b>                          |   |   |
| Editorial work on print and digital publications<br>Foreign language proofreading | Costs for editing, proofreading, layout, printing (knowledge transfer), etc.  | Applies to specialist publications and knowledge transfer publications.<br>Subsidies for publishing costs are excluded.   |

## APPENDIX 2 | Profile project: List of possible bullet points in the long and short version of the application<sup>10</sup>

**Short version (summary of the project)**, approx. 1 page (max. 4000 characters incl. spaces)

- Problem definition and scientific relevance of the project
- Originality and expected research results
- Methodological foundation
- Significance for scientific policy and social consulting
- Project duration
- Application volume

### **Long version of the application for project funding**

(approx. 20 pages; approx. 40,000 characters including spaces)

#### *a. Detailed presentation of the research project*

- Research questions, objectives and expected outcomes
- Originality and integration in the international state of research
- Theoretical foundation and methodological approach
- Implementation of the research design and validation of the findings (where applicable, remarks on access to the field and on security questions), comments on the selected research methodologies and techniques
- Project-related research ethics assessment
- Expertise of the project team and own preparatory work
- Relevance or non-relevance of the additional criteria (promotion of early career researchers, national and international research collaboration, interdisciplinary orientation, and diversity)
- Utilisation of results and publication strategy
- Potential for scientific policy and social consulting (options for knowledge transfer), potential target groups and transfer formats
- Work plan and schedule
- List of relevant research literature

---

<sup>10</sup> This list is a non-binding outline suggestion. The order and choice of points may vary depending on the application.

- Detailed cost plan stating information about the institution's own contribution / justification of individual items
- Declaration that the application, or a similar application, has not been submitted to any other funding body (date and signature)

b. *Appendices*

- Information on the applicants in the form of a CV and a list of own publications relevant to the project (maximum 4 pages)
- Designated employees – CV / own publications relevant to the project (maximum 4 pages)
- Other documents such as cost estimates for third-party services, supporting documents for research collaboration, etc. (please keep to the essentials)

### APPENDIX 3 | Additional offer for funded profile projects

The Foundation supports profile projects that have been approved for funding with additional funding offers, e.g. to enhance their scientific visibility and interdisciplinary connectivity, and foster knowledge transfer in various fields of practice. With this objective in mind, project participants can apply for subsequent approval of funding within the funding period for

- Conferences
- Scientific collaboration
- Knowledge transfer activities.

DSF provides additional funding of up to €15,000 for such extensions of the project framework.

A prerequisite for the application is the direct incorporation of the additional project elements into the research and transfer process of the funded profile project. It should be made clear how the additional funding is expected to contribute to the success of the project.

The additional funding can be approved in a simplified procedure. The application for subsequent approval of funding should contain the following information:

- A project description explaining the objectives and the concept of the project
- A list of the cost items

The project outline should not exceed 7 pages. Applications shall be submitted via the digital portal on the DSF website.
